

**Disclaimer:** Babyfeg is an independant project that is not affiliated with FEG's team, or in partnership with them in any way.

## **INTRODUCTION**

The BABYFEG Whitepaper aims to educate readers on our vision and strategy for this marketplace. Below we illustrate in detail our redistribution mechanism, which is designed to be a part in the FEG ecosystem. We are happy to be the pioneers of the FEG auto-rewards distribution system. Investors can gain passive income in FEG just by holding our tokens. We chose FEG because it's an hyper-deflationary project fully decentralized with a lot of ambitions, which means its value will grow massively in the future. They also have a robust ecosystem that will last for longterm passive income.

## **A STRONG MECHANISM.**

Babyfeg is the future of autodistribution tokens and yield-generating contracts on the Binance Smart Chain. Instead of receiving our own BABYFEG token for holding, our community is rewarded in FEG tokens, depending on the volume and the amount of BABYFEG in their wallet. A 7% tax on every transaction brings a continuous flow of FEG tokens which are dropped directly into our holders wallets. Everytime our contract buys FEG, the price of FEG increases for FEG holders all over the world. This concept comes from the various BABY tokens using this system, and we have applied it to the best DeFi project on the planet, FEG token.

## **A SAFE PROJECT FOR EVERYONE.**

The BSC sphere is filled with scammers and malicious projects. These thieves steal millions of dollars from real people, every single day. We stand in direct opposition to these crimes, and that's why we're taking the safety of BABYFEG really seriously. We have been as transparent as we can with everyone. Our contract is solid and rug-proof, and as a result everyone can invest safely in our project. Don't take our word for it though. We've been audited by TechAudit, and we are doxxed in private to a famous and trustful crypto influencer, The London Crypto. We are also providing a full team doxxed in our second audit, conducted by Dessert Finance. In the future, we are planning to do a Certik Audit, and maybe dox ourselves to our community. Our liquidity is locked, our contract is renounced, and we've divided the dev wallets to create a charity wallet (charity section below). Our only remuneration comes from the feg rewards we get along the way. Everything is transparent and can be verified on BSC Scan. Your funds are safe with babyfeg!

## **A BANANA ADDED TO THE FEG ECOSYSTEM.**

BABYFEG is not unofficially or officially endorsed by FEG token, but we officially endorse FEG. Our 2 developers are long time holders of the FEG token, and work for its success. They conceived BABYFEG as a win-win project for both FEG and BABYFEG. BABYFEG provides value for any FEG holders through our yield-generating contract. BABYFEG encourages its holders to stake their FEG rewards into the FEG staking system to obtain more passive income. Everytime our contract buys FEG tokens, 1% of the amount is burned, and 1% is redistributed to all the FEG holders, according to the taxation function of the FEG contract. This means BABYFEG is helping FEG to become a sustainable and

decentralized way of achieving financial freedom for everyone, even those who hold FEG but not BABYFEG.

## **A REAL IMPACT ON THE WORLD: CHARITY**

A charity wallet with 2% of the BABYFEG supply has been created for donations to charitable organizations who support the causes that are important to us. The BABYFEG team is fully aware of what is happening right now to the most important forest and jungles of this world, and we feel the call to step and help in every way we can. Environmental issues are a danger for both humans and animals and we will support the charity organizations that are protecting both. Overproduction, deforestation and toxic waste for capitalistic profit are a huge threat to our environment, and BABYFEG wants to be involved in this struggle for good. Our charity wallet will go only to those organization fighting bravely, and who are working directly to save animals from extinction. We will gladly spend our charity wallet money to assist established organization in carrying out the vision they have to make a difference. BABYFEG is crypto done right, we value the investment opportunities we give our holders and also the ability to build a brand, but our biggest desire is to be useful in combatting the most important causes of our planet. We are excited by this ! We have initiated contact with a variety of charity organizations and are looking for the perfect fit. All FEG rewards from the charity wallet will be used for donations. The charity wallet will provide never-ending funds for this purpose. Every donation will be documented for more transparency with our community, as this is important. Buying BABYFEG is not just a step

to reach financial freedom, its also a way to make the world a better place for everyone.

## **HIGH LEVEL MARKETTING ALONG THE WAY**

You know that BABYFEG is a great and solid project. But a solid project needs direct, organized, and thoughtful marketting to attract investors. Thats why BABYFEG created a 5% tax to pay for the marketting operations. Since the creation of our token, aggressive marketting (influencers, articles in crypto medias, Youtube, ads, shilling firms, etc.) has been bringing more and more holders every day. As the marketting wallet grows, our marketting campaign will be bigger and bigger and all of these funds will be used to build BABYFEG and grow the investments of our holders. Our goal is that BABYFEG becomes well known, and rises to the top of the meme token world. No one will be able to ignore the existence of BABYFEG.

## **THE FUTURE OF BABYFEG**

The BABYFEG's team has provided an awesome roadmap that you can check on our website. We've got insane longterm plans for BABYFEG. First of all, we will develop an ambitious video game directly connected to the blockchain, with BABYFEG and FEG rewards included. Additionally, we will create an awesome BABYFEG NFT collection that you will be able

to buy and trade. A VR/AR application will be developed to watch these NFTs in real or virtual environments, on your mobile phone or with a virtual reality headset. We are very very excited by the upcoming FegEx autodeployer, and are preparing to list with them as soon as it is available. Our biggest project, though, is to create the BABYFEG Foundation, for the express purpose of protecting endangered species from extinction. This of course could go in many directions, as we navigate how to best use our money and crypto platform, but our greatest desire is to create an animal sanctuary, where animals are brought to live and to be protected for the rest of their lives. And of course, a lot more surprises will come along the way.

Investing in BABYFEG is investing in a bright future !

SO GET YOUR BABYFEG TOKENS NOW, EARN YOUR FINANCIAL FREEDOM WHILE YOU'RE MAKING THE EARTH A BETTER PLACE FOR EVERYONE.
